

CERIDIAN[®]

Bathtubs & Showers
AQUA GLASS[®]

surface quality and strength

Easy to install, this remodeler's tub/shower is produced from an exciting new material designed with the Aqua Glass customer in mind

new advancements
in bathing fixtures do
not occur every day.

Ceridian, a revolutionary
new material, redefines
the standards of quality
for tub/showers.

Aqua Glass introduces Ceridian

a high-tech material for bathing
fixtures that excels in surface quality,
structural strength, tight tolerances
and elegance of design.

Ceridian is created in a high-tech
production process which incorporates
a ceramic surface treatment with
a poly-ceramic substrate.

The result – a superior high gloss,
solid material for bathing fixtures
that is designed to withstand many
of the challenges in the construction
process, not to mention years
of use by the homeowner.

The Ceridian manufacturing
process allows for multiple-piece
tub/showers designed with the
customer in mind. Molded features
allow for added strength, easy
installation and an effective
joint design, as well as intelligent
styling of complex shelving that
maximizes storage, bathing
and showering space.

The tough Ceridian material
carries the Aqua Glass
5-year warranty and
is easily repairable
should construction
damage occur.

hassle-free installation

easily transportable three piece design

Aqua Glass' clear view packaging makes shipping, loading and transportation easy and safe. Shipped disassembled and ready to install.

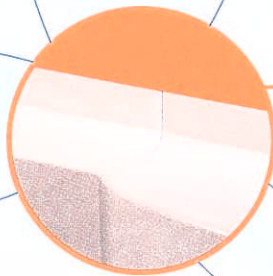

total front assembly

Installation can be done quickly and hassle-free. Assembly is completed from the front of the unit with special clips that affix to the walls. This convenient, time-saving method eliminates the need to get to the back of the unit once it is in place.

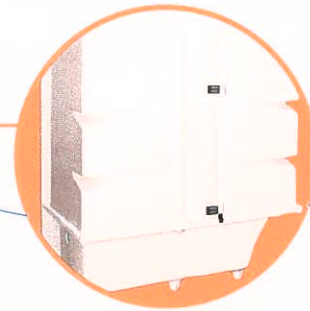

engineered hidden joint

The vertical joint is designed to prevent water wicking to the studded wall, while incorporating an attractive overlapping column that hides any visual seam.

smooth back surface

The back of Ceridian fixtures are smooth and easy to handle – no fiberglass strands to irritate the installer.

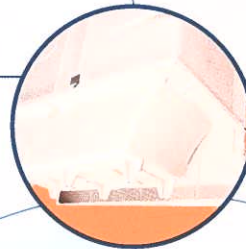

strength and design

extraordinary strength

Ceridian's high-tech dense poly ceramic substrate and molded structural ribbing yields tremendous strength and durability – providing protection from handling damage and creating a solid fixture for the homeowner.

molded to perfection

The precision molded parts have tight tolerances to ensure problem-free installation.

attention to detail

superior surface quality

Ceridian's high gloss surface treatment provides a pure finish which sets a new standard for quality and consistency. The sleek, blemish-free surface allows for easy cleaning by the homeowner.

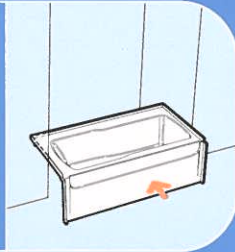

intelligent design

Recessed molded shelving creates a wonderfully functional unit with ample space for bath and shower supplies, without sacrificing space. The tasteful flowing lines of this unit will make it an attractive part of any bathroom.

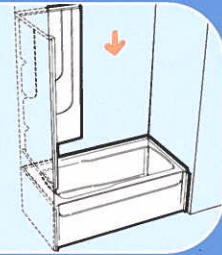

simple installation

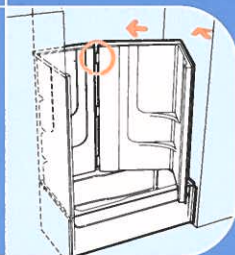

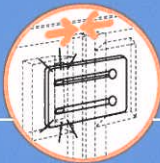

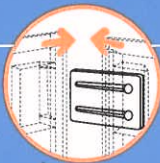

- 1** Level and plumb tub/shower base. Fasten tub/shower base to framing.

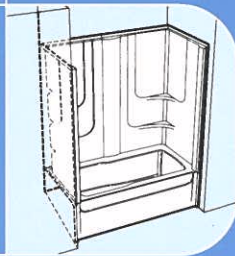

- 2** Install first wall section (3 shelves), sliding bottom wall clip over tub flange.

- 3** Place second wall section (2 shelves) on top of tub, rotating into place as wall clips slide over and secure to the first wall.

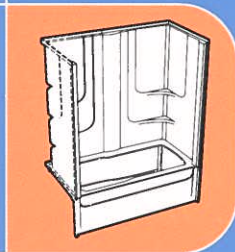

- 4** Permanently fasten the wall section to the framing.

- 5** Ceridian tub/shower unit is ready for use.

Model N^o C76032A

60" x 32" 3 piece tub/shower available in left or right hand drain.
